

# FLR

**FLUORESCENT  
SUBLIMATION INK  
TECHNICAL DATA**

**Actual printed fabric sample using FLR ink**

Designed for printing on polyester based materials this new ink series is Black Light reactive and has the potential to expand the kind of sublimation products you offer.

FLR works best with intense pastel and tropical colors and with large, solid areas of color. In low light interior environments the inks can be used to create unusual artwork, murals, banners and signs illuminated by black light bulbs.

FLR is a great solution for commercial signs and displays where vibrant visual impact is required. In addition, the reflective properties make them ideal for a variety of safety applications.

**COLORS**

**YELLOW**  
**MAGENTA**
