TECHNICAL DATA

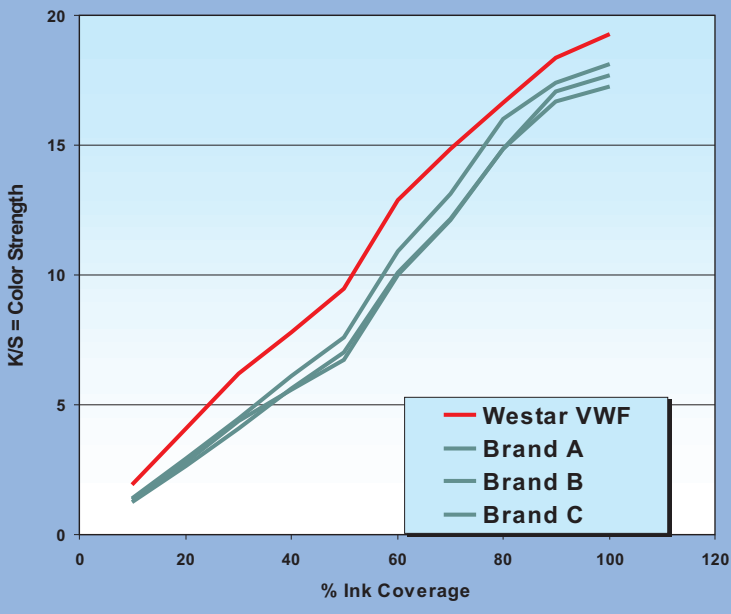

Color Strength Comparative Analysis Results

Westar Systems' Vibrant Wide Format (VWF) ink set was tested against three other leading sublimation inks by a European ISO facility using coverages from 10% -100%. The redline in this chart represents VWF ink. The green lines represent three other leading inks compared to Westar's VWF.

These test results demonstrate that VWF inks have 18 to 31% more color strength. If you use VWF inks with it's stronger color strength you can obtain the same color, but with less ink, which in turn will save you money.

Color Strength of Sublimation Ink
Westar Systems VWF
vs
Leading Brands A-B-C

COLOR STRENGTH

VWF inks are a proven sublimation solution. They have demonstrated excellent quality and color stability.

VWF inks are engineered for use on wide format (42" or wider) water based, ink piezo printers such as Epson, Mimaki, Mutoh and Roland.

VWF Outperforms Other Brands

- 18.5% Stronger than Brand A
- 25.8% Stronger than Brand B
- 31.8% Stronger than Brand C

Most Vibrant
Reliable Jetting
Consistent Color
Long Lasting
Expansive Gamut
Excellent Lightfastness
Stable
